Information	Ferrari colours, Rosso Corsa paintwork over Sabia

suppléméntaire:	interior.This is a very well specced car and looks brilliant, it has got to one of the nicest 360 Spiders on the market today, and has all the important options.The red paintwork is in brilliant condition and has the yellow Scuderia wing shields, red calipers and front & rear Challenge grilles.The interior is stunning and unmarked, the seats are fully electric and have the Ferrari emblem in the headrests, the leather is Sabia with red piping and the carpets are red also.The exhaust has been upgraded to a Tubi system and it sounds absolutely fantastic, it is quite loud and wails just like a Ferrari should. The wheels have also been upgraded to Kahn 19" split rims, these are wider than the standard 360 rims so give the car a much more purposeful stance.
